

NODEJS - EXPRESSJS

ANEKO ACADEMY

EXPRESS

express

A Node Framework which simplifies writing Server-side Code and Logic.

Based on Node, offers
same Functionalities

Middleware-based:
Funnel Requests
through Functions

Includes Routing,
View-rendering &
More

Simplifies the Usage of Node. Express is for Node what Laravel would be
for PHP.

EXPRESS FLOW

```
const express = require('express' 4.16.2 )  
const app = express()
```

1- Hiring the manager

```
app.use(function (req, res, next) {  
  console.log('Request: ', req)  
  console.log('Response: ', res)  
  next()  
})
```

2-Got shirt and shoes?

```
app.get('/', function (req, res) {  
  res.send('Hello World!')  
})
```

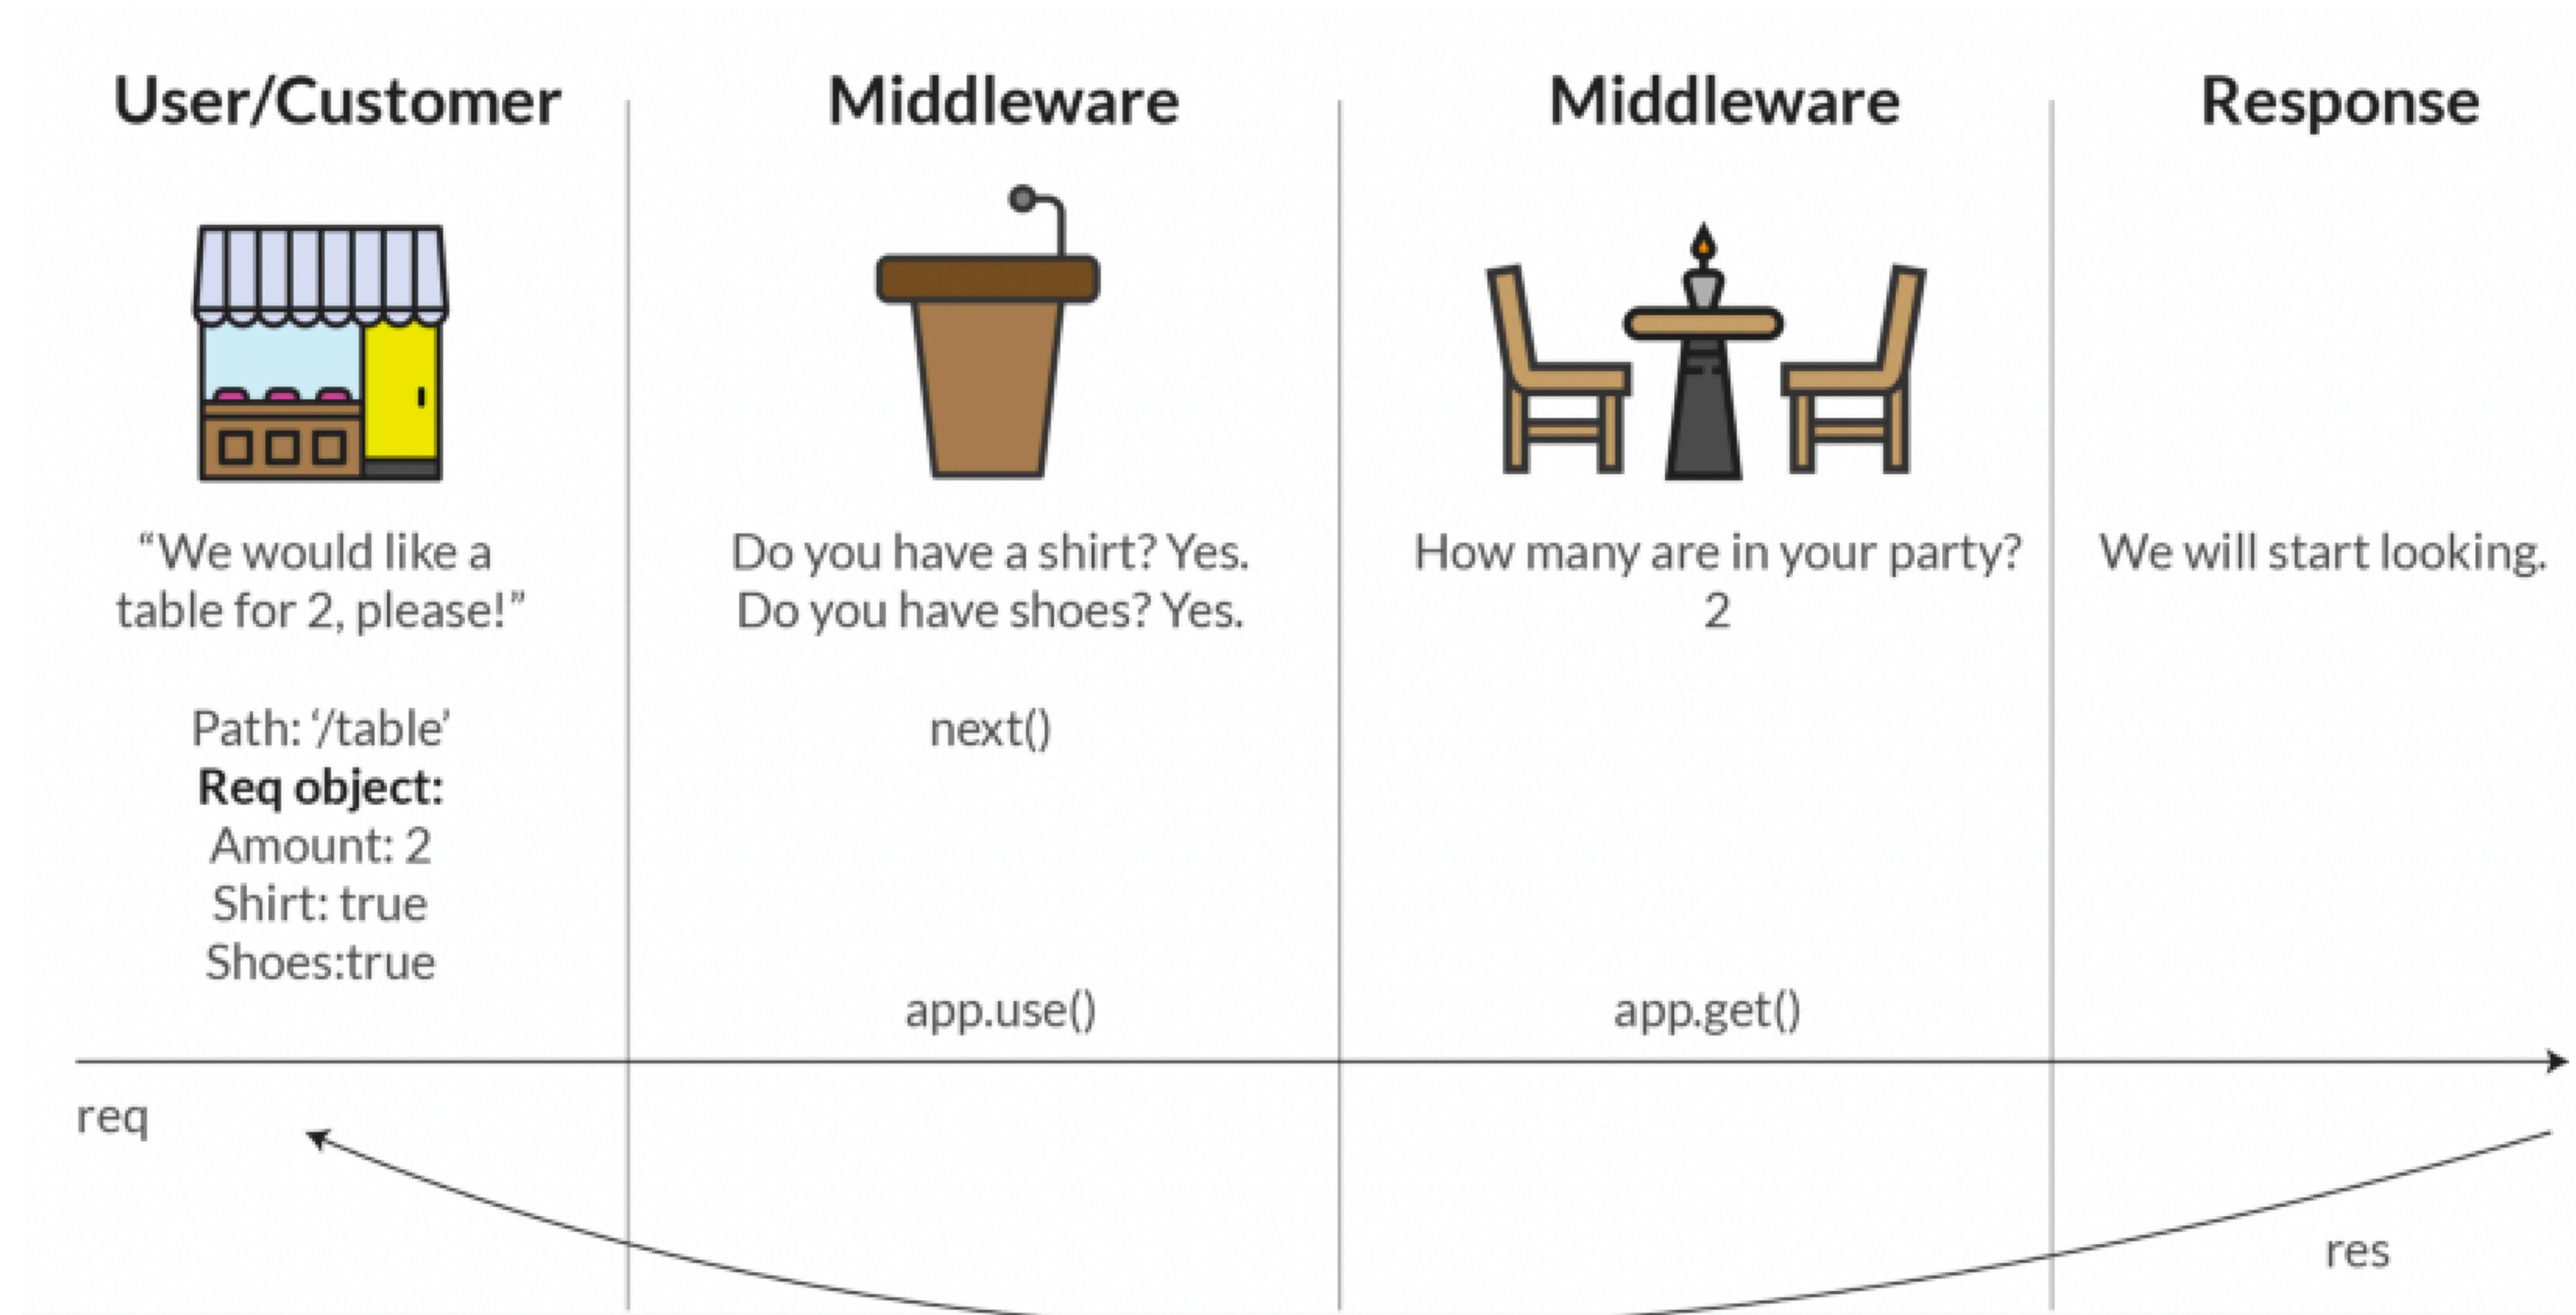

3-Taking an order

```
app.listen(3000, function () {  
  console.log('Example app listening on port 3000!')  
})
```

4-Open for business

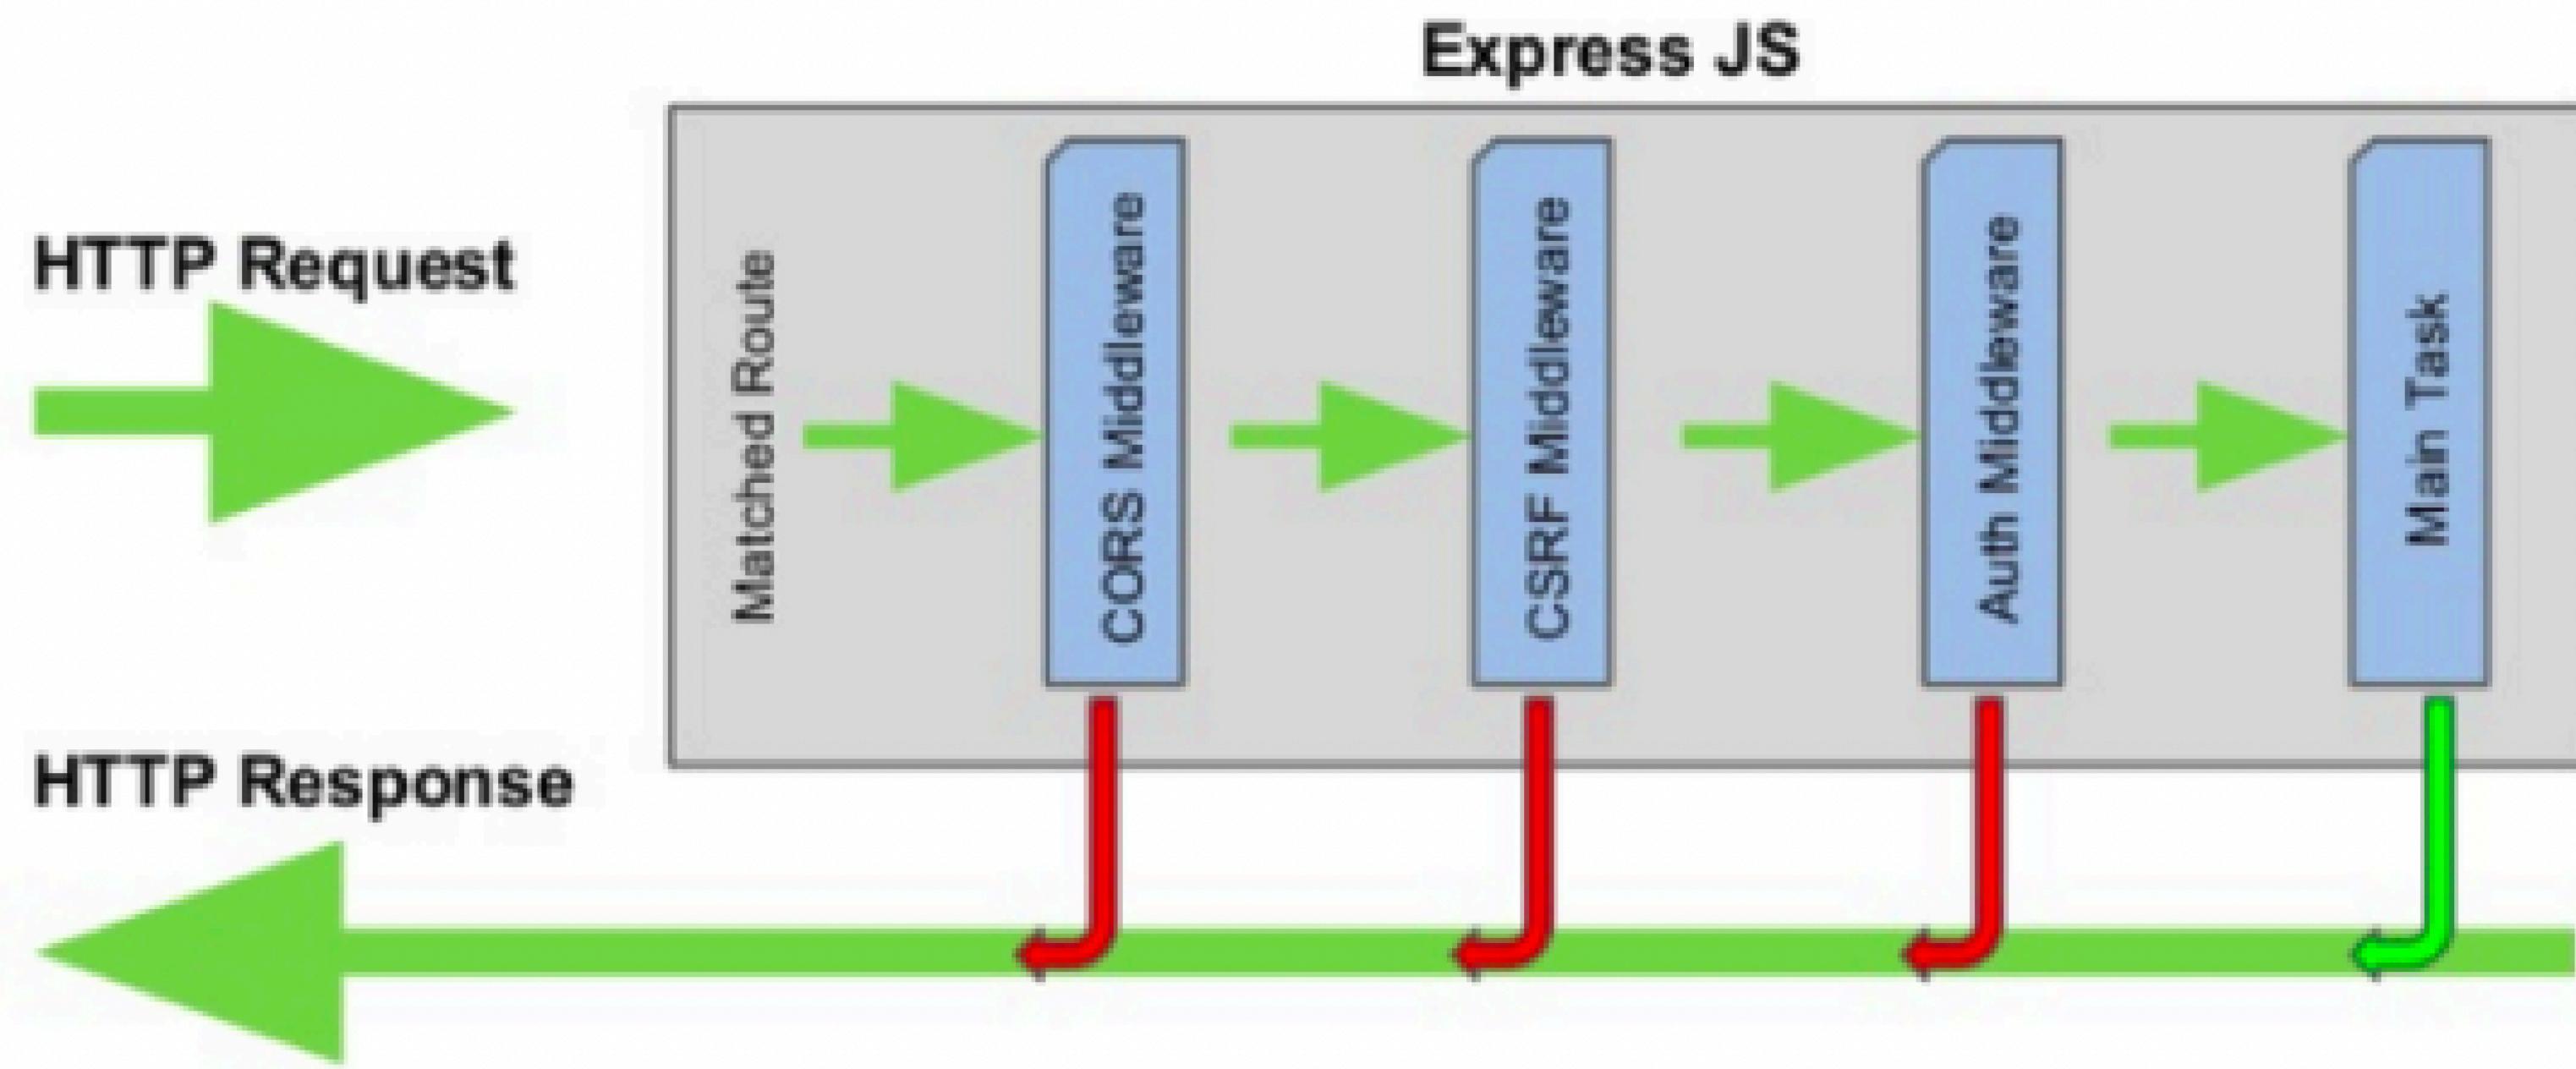

EXPRESS FLOW REPRESENTATION

EXPRESS IMPLEMENTATION STEPS

1. The require statements
 2. Middleware
 3. Routing
 4. App.listen() / Starting the server
-
